

For Schools, By Schools:

Introducing the New RollCall Driver App

At RollCall, we believe the best solutions come directly from the people who use them every day. That's why our new Driver App, launching in Term 4, 2025, has been built hand-in-hand with schools, drivers, and administrators who know exactly what works - and what doesn't - on the ground.

This update is more than just a refresh. It's a smarter, safer, and more intuitive tool designed to streamline workflows, cut down on admin time, and strengthen duty-of-care practices across every journey.

A Fresh, Modern Design

The first thing drivers will notice is the cleaner, more intuitive interface. The updated design makes it simpler to navigate on the go, with clearer visuals, easier-to-read screens, and a layout that reduces clutter. The result: faster access to the information drivers need, without distraction.

Smarter Manifests and Stop Management

Flexibility is now built directly into the Driver App's manifest system, thanks to feedback from schools that face constantly changing bus routines.

- **Add unexpected students instantly:** Drivers have always been able to manually add a student if they forgot their tag. The real challenge was when a student doesn't have a tag and isn't listed on the manifest at all. Now, drivers can quickly search the student database and add them on the spot - even if they don't normally travel on the bus. This is a game-changer for schools where bus travel isn't always regular or predictable.
- **Full stop details at a glance:** Each stop now displays the complete address, eliminating ambiguity and keeping routes precise.
- **See all stops, every time:** Drivers can view the full route including every stop, regardless of whether students are booked. This ensures no stop is ever missed and strengthens compliance across every journey.

These updates make daily operations smoother for drivers while strengthening accountability for schools.

New Safety Features: No Child Left Behind

Child safety sits at the heart of everything RollCall does. The new Driver App includes powerful updates to support duty of care:

- A **flashing Bulk Off button** provides a visual reminder to drivers to bulk off students upon arrival on campus in the morning. This alert is automatically triggered by the geo-fence location for campus, ensuring the check happens at exactly the right time.
- For schools using **Bus Guardian**, new **on-screen pop-ups** prompt drivers to complete their end-of-trip checks - adding another layer of assurance that no child is ever left on the bus.

These updates give schools and families greater peace of mind, while making compliance simple and seamless for drivers.

Driver Maps, Now Even Smarter

Until now, schools provided drivers with a **printed QR code** linking to their route map. Copies were left in buses or handed to new or relief drivers so they could quickly access a map if they weren't familiar with a route.

With the new Driver App, that process is even easier. Drivers can now access **the QR code for Driver Maps directly from their device**. No more relying on printed copies – the map is always available, always up to date, and always in the driver's pocket.

This small but powerful change means schools can ensure every driver, whether regular or filling in, has reliable access to the correct route information at any time.

Built With You, For You

The new Driver App reflects RollCall's ongoing promise: to build solutions **for schools, by schools**. Every feature comes from direct feedback, shaped by the needs of staff who balance efficiency, compliance, and safety every single day. And this is just the beginning.

The launch of the Driver App is the **tip of the iceberg**, with even more innovations planned for 2026. Our open-door policy means we'll continue to listen, adapt, and grow RollCall together — ensuring schools always have the tools they need to thrive in a constantly changing environment.

Be Ready for the Change

We'll be sharing more detail in upcoming newsletters, along with training and support resources to help your team get the most from the new app. Together, we're making student safety smarter, simpler, and stronger.
